Summary

AI/Data Engineer with experience building machine learning systems, data pipelines, APIs, and production-oriented AI applications. Skilled in Python, SQL, FastAPI, PostgreSQL, machine learning, model evaluation, and AI workflows, with experience translating business requirements into technical solutions. Interested in building reliable data and ML platforms that support personalization, automation, and data-driven products.

Skills

Languages: Python, JavaScript, TypeScript, SQL

Frameworks & Tools: FastAPI, React, Next.js, REST APIs, Git, PostgreSQL

Data & Machine Learning: Machine Learning, Model Evaluation, Data Cleaning, Exploratory Data Analysis

AI & LLMs: Prompt Engineering, Retrieval-Augmented Generation, LLM Agents, Gemini API

Experience

Data Science Intern

Feb 2026 – May 2026

Glow Logics Solutions Pvt. Ltd. (Bengaluru, India)

Tools Used: Python, SQL, Machine Learning

- Analyzed and cleaned production datasets using Python and SQL, applying machine learning models to generate actionable product and customer insights.
- Built model evaluation and validation workflows, then translated technical results into clear recommendations for engineering and business stakeholders.

Product Strategy & Full-Stack Contributor

Feb 2024 – Jan 2026

UnicornSpace (US-LLC) (Bengaluru, India)

Tools Used: React, Next.js, FastAPI

- Translated user research and customer engagement data into feature roadmaps, technical feasibility assessments, and prioritized product requirements.
- Partnered with marketing, engineering, and support teams to ship features and improve codebase quality and delivery speed.

Projects

AI-Powered Customer Churn Prediction Platform | TypeScript, Python, FastAPI, PostgreSQL

GitHub

- Built a full-stack churn prediction platform with feature engineering, model explainability, JWT/RBAC authentication, and revenue-risk dashboards.

SecureAudit Toolkit | React, TypeScript, Gemini API

GitHub | Live

- Developed an AI-assisted web security auditing tool for cookie and webhook validation, automated vulnerability scanning, and tamper-evident audit logs.

ProfileGuard AI | React, TypeScript, Gemini API

GitHub | Live

- Built an AI toolkit that diagnoses Google Business Profile issues using semantic analysis, automated policy checks, and customer workflow dashboards.

Awards & Certifications

- **Professional Program in Data Science – Glow Logics:** Structured program covering applied data science fundamentals and workflows.
- **Data Science with Generative AI – Sheryians:** Coursework on generative AI concepts, LLM workflows, and applied data science.
- **Oracle Certified Data Science Professional:** Certified on core data science principles and practices.

Achievements & Extra-Curricular

- **Hackathons:** Participated in 7+ hackathons; 3-time winner at the national level, including MLH Frost Hacks (Hyderabad) and the HKBK National Level Project Expo.
- **NCC:** Cleared the NCC 'C' Certificate (National Cadet Corps).
- **Athletics:** Represented South Zone at the state-level athletics competition.

Education

Bachelor of Technology in Information Science and Engineering

Visvesvaraya Technological University

Bengaluru, India
